TDRA Youth Council Organizes an Awareness Workshop on WRC-23 in the Presence of UAE's Youth Councils

The TDRA Youth Council organized an awareness workshop on the 2023 World Radiocommunication Conference (WRC-23), hosted by the UAE from 20 November to 15 December. The workshop aimed to introduce the conference and understand how it affects diverse sectors. It also discussed the role of Emirati youth in the success of this global platform, bringing together global leaders and experts to discuss on the future of radiocommunications in the years to come and revisions made to the Radio Regulations.

TDRA Wins Mohammed bin Rashid Arabic Language Award for its comprehensive project to support Digital Arabic Content

TDRA won the Mohammed bin Rashid Arabic Language Award - Class of the best Language Policy and Planning Initiative, for its comprehensive and multifaceted project to support Arabic digital content. Over the years, TDRA has diligently developed and implemented this project, in alignment with the Arabic Language Charter launched by His Highness Sheikh Mohammed bin Rashid Al Maktoum, Vice President and Prime Minister of the UAE and Ruler of Dubai in 2012.

TDRA Calls on Public to Promptly Report Lost or Stolen Mobile Devices

TDRA urged the public to notify UAE telecom service providers in case of loss or theft of their mobile devices, especially considering the growing significance of these devices in daily life. TDRA seeks to raise awareness regarding procedures for reporting the loss/ theft of a mobile phone. UAE telecom service providers offer various channels through which the public can communicate to report such incidents, including customer service call centers, live chat services on websites, and other operator affiliated channels. The UAE stands as a pioneer among countries in the region and a forerunner in developing requisite systems and procedures in this regard.

TDRA Obtains Cert IPSAS

TDRA, represented by the Human Capital Department, obtained the Certificate in International Public Sector Accounting Standards (Cert IPSAS) from the Association of Chartered Certified Accountants (ACCA), one of the leading and globally recognized international organizations in the field of accounting. TDRA is the first federal entity to obtain such certificate, which reflects the evolvement of capabilities and expertise within TDRA's workforce in the field of finance. It also underscores TDRA's leadership, its dedication to excellence in financial management, and its preparedness to setting new benchmarks for financial transparency and accountability in the public sector.

The Metaverse technology

The report 'Responsible Metaverse Self-governance Framework' covers information about the metaverse, a new virtual world that facilitates users' interactions through various technologies, like Virtual Reality (VR) and Augmented Reality (AR). The report emphasizes the need to establish self-regulatory shared core principles for responsible metaverse use to ensure safety and digital security within this emerging space.

UAE Net Zero Strategy 2050

This strategy is designed to serve as a driving force of economic and societal advancement by leading the transition to net zero emissions and contributing to global efforts in mitigating climate damage. The strategy has over 25 programs across the following six key sectors:

1. Energy
2. Industry
3. Transport
4. Construction/Building
5. Waste
6. Agriculture

Zero Government Bureaucracy Programme

The UAE launched the Zero Government Bureaucracy (ZGB) programme, aimed at overhauling the current government work structure to enhance governmental efficiency, quality and resilience in UAE.

The programme seeks to reduce government formalities and eliminate redundant procedures and requirements. Ministries and government entities are tasked with the immediate implementation of the programme, which includes abolishing at least 2000 government measures, cutting down at least 50% of processing times, and doing away with all unnecessary bureaucracy in a year. Progress will be assessed and best achievements marked by end of year 2024.

National Space Academy

The National Space Academy is aimed at enhancing young Emirati cadre skills in space science and technology, by equipping those individuals with world-class skills and knowledge according to top international standards and practices, so as to allow them to be influential contributors to the rousing success of the UAE Space Programme.

Child Protection Policy

This Policy aims to comprehensively support families and caregivers by enabling them create a safer environment for children within a healthy and nurturing social setting that ensures a stable and well-balanced upbringing, with a focus on the child's best interest.

Vision "We the UAE 2031" and Sciences

Science and technology initiatives are aligned with the second pillar (Forward Economy) of Vision "We the UAE 2031". According to this Vision, the UAE seeks to be an attractive incubator for future innovators and entrepreneurs. The Vision is aimed to make the UAE a catalyzing environment for innovation at global standards, embracing best innovators and entrepreneurs, and supporting leading R&D in science and technology.

Economic Principles of UAE

'The Economic Principles of UAE' represent a roadmap, defining the features and foundations of the next phase in UAE's economy. They aim to position the UAE as a globally integrated economy offering a fully-fledged digital infrastructure, secure systems, adaptive legislation, a forward-thinking mindset, an attractive destination for creative minds, and an influential country in the world economy.

National Platform for Gender Balance

This Platform features a central dashboard for gender balance data at the federal government and local governments, along with a governance system for performance data, projects and targets. Each local government will have a dedicated display board to update its respective data.
