Global Digital Compact

The Global Digital Compact is a comprehensive global framework for digital cooperation and governance of artificial intelligence. 20 years after the World Summit on the Information Society, it charts a roadmap for global digital cooperation to harness the immense potential of digital technology and close digital divides.

Co-operation with OECD

The UAE regularly collaborates with the Organisation for Economic Co-operation and Development (OECD) to organise the annual meeting of the MENA-OECD Working Group on open and innovative government, with the shared objective of developing and leading inclusive digital maturity. As part of the MENA-OECD Governance Programme, this collaboration supports peer-to-peer exchange among OECD Member countries and their partners in the MENA region, with the aim of transforming governance for future-ready, citizen-centred, innovative and digitally enabled governments.
