Virtual Networking

About the Service/Feature

The Telecommunications Regulatory Authority and the Digital Government provide two types of network connectivity that connect government entities to the federal government network. One is the dedicated network connection (MPLS), which is an encrypted connection used to connect government entities through a private network with the highest service level standards. The other connection is the virtual network connection (VPN), which is done through the Internet to the FEDnet.

Service steps

Step 1 → Register using UAE Pass

Step 2 → Submit a service request

Step 3 → Fill in the technical details questionnaire by the applicant

Step 4 → Review of the application and questionnaire by the Authority

Step 5 → Get connected to the FEDnet
