

## Default Networking

### About the Service/Feature

The Telecommunications Regulatory Authority and the Digital Government provide two types of network connectivity that connect government entities to the federal government network. One is the dedicated network connection ( MPLS ), which is an encrypted connection used to connect government entities through a private network with the highest service level standards. The other connection is the virtual network connection ( VPN), which is done through the Internet to the FEDnet.

### Service steps

- Step 1** → Login using the UAE Pass
- Step 2** → Submit the service application
- Step 3** → Fill in the technical details questionnaire by the applicant
- Step 4** → Review the application and questionnaire by a specialized team at the Authority
- Step 5** → Get connected to FEDnet

|                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
