

## Default networking

### About the Service/Feature

TDRA provides two types of connectivity to connect government entities to FedNet. Private dedicated connectivity is encrypted and used to link government entities via a private network with high standards, while virtual private networking is made online via FedNet. Connectivity is made upon the requirements of the applicant and in coordination with FedNet.

### Service steps

- Step 1** → Log in using your UAE Pass account
- Step 2** → Submitting the service application
- Step 3** → Completing the required survey on technical details
- Step 4** → The application and survey to be reviewed by TDRA
- Step 5** → Getting the connection with FedNet
