

Private Dedicated Connectivity

Step 9 Get ad hoc/customized/dedicated networking

About the Service/Feature

TDRA provides two types of connectivity to connect government entities to FedNet. Private dedicated connectivity is encrypted and used to link government entities via a private network with high standards, while virtual private networking is made online via FedNet. Connectivity is made upon the requirements of the applicant and in coordination with FedNet.

Service steps

Step 1 > Login using the UAE Pass
Step 2 Submit the service application
Step 3 Receive a no-objection letter from TDRA addressed to the service provider
Step 4 Directly reach out to the service provider to request lines (by the applicant)
Step 5 Notify the Authority team of the connectivity readiness
Step 6 > Joint meeting between the FedNet team and the applicant
Step 7 > Fill in the technical details questionnaire by the applicant
Step 8 Review the application and questionnaire by a specialized team at the Authority

Туре	Transactional
Expected Time	5 working days
Fees	Free of Charge
Audience	Government Sector
About	TDRA provides two types of connectivity to connect government entities to FedNet. One is the Multiprotocol Label Switching (MPLS), which is an encrypted connection used to link government entities via a private network of the highest service level standards, while the other is virtual private networking (VPN), which is done online through FedNet. The linking mechanism is established based on the applicant's requirements and in coordination with the FedNet team.
