

## Providing Cloud Infrastructure (IaaS)

### About the Service/Feature

Providing convenient, on-demand access to a shared pool of configurable computing resources (e.g. networks, servers and storage), with a centralized deployment model, compute and storage resources enabling rapid service provision and launch with minimal management effort or interaction with service provider. The overall objective is to create a more agile federal enterprise where services can be provisioned on demand to meet government compute requirements. The service provides the following features: - Data migration feature (self-service): linking the government entity with FedNet so that the entity's business can be migrated from its location to FedNet using VMware Cloud Migration tools - The entity's infrastructure must be compatible with VMware technology - VPN feature (Self-Service): The secure virtual networking (VPN) feature within FedNet cloud enables the entity's employees to benefit from their corporate services remotely. In addition, the feature can be utilized as a site to site VPN termination point for the entities to connect to FedNet.

### Service steps

- Step 1** → Register with UAE Pass
- Step 2** → Submit a service request
- Step 3** → Fill-in the onboarding form
- Step 4** → TDRA will review the request and the form
- Step 5** → Receive the service
